General Product Information

We've spent over half a century proving and enhancing heavy-duty shock performance.

When there's a lot riding on the success of your fleet, you need shocks you know you can depend on. That's why so many heavy-duty/commercial vehicle operators and fleet owners turn to Gabriel® FleetLine® shocks. We improve upon our designs based on the real-world needs and the increasing demands of fleet operators. Plus, operators and owners know they're getting **proven performance**, durability and dependability with FleetLine shocks. It's the kind of trust you'll only find from the company whose HD shocks have been providing industry-leading confidence and quality for over 50 years – The Original Gabriel.

FleetLine shocks are designed as a direct replacement for commercial OE shocks, so they're built to match and/or exceed OE specs and quality standards. They also feature a valving rate that compensates for initial truck suspension softening, providing performance that specifically matches the original.

FleetLine shocks offer innovative features like forged solid steel, **360° arc-welded eye rings and end mounts (http://gabriel.com/heavy-duty/technology-overview/end-mount/)** ,[5 (http://gabriel.com/heavy-duty/products/fleetline/#footnotes)] a pressurized piston ring that compensates for wear, and a multi-lip **piston rod seal (http://gabriel.com/heavy-duty/technology-overview/piston-seal-assembly/)** . For superior damping abilities along the entire spectrum of operation, FleetLine shocks incorporate a caged piston design. In recent, Gabriel–conducted “fade” test comparisons against a major competitor, the competitor lost more than 20 percent of its damping performance as it moved toward more extreme, heated operating conditions. Gabriel, however, remained steady, operating within 7 percent of its original damping performance under the same conditions.[3 (http://gabriel.com/heavy-duty/products/fleetline/#footnotes)] Plus, every FleetLine shock comes with a super-finished **chromed piston rod (http://gabriel.com/heavy-duty/technology-overview/super-finished-chrome-piston-rods/)** to give you the kind of corrosion prevention and long-lasting durability that will continue to muscle its way through even the toughest jobs and heaviest loads
