# Alliance Air Disc Brake Calipers

## Air Disc Brake Calipers Features & Benefits

**Key Product Features & Benefits**

| Features | Benefits |
| --- | --- |
| Every unit is remanufactured to OE specs, making it better than rebuilt, and more cost effective than OE | Allows for significant cost savings over OE new calipers. |
| Components are cleaned, inspected, and treated with rust preventative coating | Enables extended rust-free operation and improved overall product life. |
| Every caliper is tested utilizing OE brake system analyzers | Ensures uniform operation of moving components to provide enhanced quality, superior performance, and reduced maintenance. |
| All rubber components, bushings, and guide pins are replaced with 100% new OE quality equivalents | Prevents premature failure due to eroding. |
| Castings are coated with premium coating and baked at 400 degrees | Provides corrosion protection in harsh operating environments and improves visual appearance. |

**Heavy Duty Stopping Power**

- Every unit is remanufactured to OE specs, making it better than rebuilt, and more cost effective than OE
- Components are cleaned, inspected, and treated with rust preventative coating
- All rubber components, bushings, and guide pins are replaced with 100% new OE quality equivalents
- Castings are coated with a premium protective coating to provide corrosion protection in harsh environments

**Coverage of All Applications**

- Trucks
- Trailers
- Transit Buses
- Motor Coaches

- Fire Trucks
- Waste

**Heavy Duty Braking Options**

- Designed for performance in extreme conditions
- Lighter weight
- Internal cooling due to increased air flow
- Shorter stopping distance
- Elimination of Brake Fade
- Longer service life of friction material
- Reduced potential for Compliance, Safety, Accountability (CSA) violations
