Alliance Hydraulic Brake Calipers

Features and Highlights

- 100% core inspection and qualification with a proprietary core receiving process.

- The disassembly process ensures **maximum component salvage and integrity.**

- A 100% component inspection and testing process ensures well-defined acceptance criteria before assembly.

- 100% End-of-Line test for pistons displacement, force, and delta between pistons forces. Acceptance criteria and specs are developed by benchmarking OE samples.

- 100% in-process fitment inspection, utilizing OE samples geometrical data via certified inspection gauges.

- All wear-prone components such as elastomers, rubber, seals, and fasteners are subject to mandatory replacement with new ones.

- Corrosion protected by Premium Quality E-Coat.

- Utilization of internally developed **best-in-class cleaning**

Coverage of All Applications

- Pickup Trucks
- Box Truck
- School Buses
