General Product Information

Detroit coolants are different - specifically formulated to not just meet, but to exceed the performance requirements of your Detroit or Mercedes Benz engine. Detroit Coolant provide reliable protection in even the most extreme heat and freezing cold conditions.

Detroit POWER COOL PLUS Extended Life Diesel Engine Coolant is a Nitrite-Free, non silicate, non-phosphate formula that eliminates inhibitor dropout and scale problems. Detroit POWER COOL PLUS keeps the cooling system running cooler and the components lasting longer while providing complete protection against corrosion, erosion and cavitation for 1,000,000 including conventional SCA type products.

Detroit POWER COOL Fully Formulated DIesel Engine Coolant is pre-charged with supplemental coolant additives in a low silicate, non-phosphate formula that helps prevents inhibitor dropout, scale deposits, and gel problems frequently associated with diesel engine cooling systems for 2 years/25,000 miles.

Warranty Information

Power Cool Plus & Power Cool meet Detroit Fluid Specification 93K217 and is approved for warranty
