# Restore™/Restore™ Plus Heavy-Duty Coolant Cleaners

The safe and efficient way to clean heavy-duty cooling systems

## Remove Contaminants Without Harm.

Once a cooling system is contaminated, water alone cannot clean the system. Fleetguard Restore and Restore Plus address a wide range of contamination without harming the metal surfaces, gaskets, hoses or plastic components of heavy-duty cooling systems.

## Application/Performance Chart.

The choice of cleaner should be based on the cooling system problem to be addressed

| Problem | Restore | Restore Plus |
|---|---|---|
| Silicate Gel | Excellent | Poor |
| Rust | Poor | Good |
| Scale | Poor | Excellent |
| Oil, Grease & Fuel | Excellent | Good |
| Solder Bloom | Poor | Good |

**Restore**

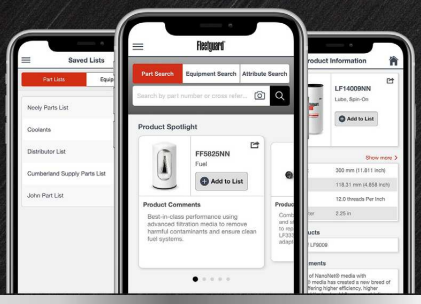

- Alkaline-based chelating cleaner particularly effective in cleaning silicate gel
- Highly effective in removal of oil and fuel contamination

**Restore Plus**

- Acid-based chelating cleaner
- Designed to remove heavy rust and scale deposits
- Can also remove oil contamination and solder bloom

**Important:**

Fleetguard Restore and Restore Plus contain NO antifreeze.
Do not allow cooling system to freeze during cleaning operation!
