Turbochargers

DD13, DD15, & DD16 | Series 60 & Series 50 | MBE 4000 & MBE 900

Turbochargers are extremely complex assemblies that are vital to engine performance, fuel economy, and emissions compliance. With internal components rotating at speeds up to 120,000 RPM they are also safety critical. Detroit Reman combines 30 years of experience along with OEM expertise to provide a high quality Turbocharger that can be trusted to restore power at a lower cost.

Product Highlights

Inspection
Every Turbo brought into the facility is completely disassembled and closely inspected for wear.

Recovery
All parts designated for recovery are brought back to OEM specification.

High Quality Materials
All wearable components are replaced with new and meet strict metallurgical criteria designed for durability and strength.

Precision Machining
OEM machining tolerances are upheld with precise accuracy measured in microns, or 0.001 millimeters.

High-Speed Balancing
All shafts, wheels, and assemblies are balanced to OEM specification on high-speed balancers.

Hot Gas Stand Testing
Air pressure, flow, and temperatures are verified to match OEM performance and efficiency.
