Product Highlights

QUALITY

Quality products require industry-leading research, development, and collaboration. That's why Firestone Industrial Products executes nearly 200 research projects annually, with R&D facilities in the United States, China, and The Netherlands. As part of the Bridgestone family, we also regularly collaborate with their global R&D locations.

Our products are engineered to meet the strictest standards and customer specifications, but also meet you at your point of need. If you're an Original Equipment Manufacturer, count on our engineers to work alongside you to build custom solutions for your unique vehicle performance expectations. Tell us what you need and we'll build a high-quality solution that lasts. If you're an everyday adventurer in search of air springs for your pickup, RV or semi-truck, Firestone Ride-Rite has durable solutions for you, too.

Our engineers always pursue excellence and continue to impact the innovation of integrated automotive and commercial technology through partnerships with leading associations and universities. Firestone Industrial Products is a corporate member of CLEPA, the European Automotive Supplier Association focused on aligning industry needs with the EU regulatory framework.

RELIABILITY

Buy, ride, and haul with confidence. That's a Firestone promise. Our rigorous testing, commercial grade materials and adherence to strict local and global standards are just a few of the reasons why commercial vehicle OEMS, automotive OEMs and everyday drivers around the world select Firestone as a suspension partner.

The proof is already on the pavement and has been for thousands of miles and many years. We engineer and manufacture each product to provide years and thousands of miles of trouble-free service. Firestone Air Springs have a reputation for outlasting other original equipment, like shocks and bushings, and reducing suspension fatigue and tire wear. Our proven reliability is one of many reasons we work with the top vehicle manufacturers globally.

SERVICE

Firestone Industrial Products has the global service to match our global production. From our engineers to our customer service line, we pride ourselves on being a true partner, not just a vendor. And with global testing and R&D facilities, we ensure the partnership remains a close one.

As problem solvers, our expertise extends to your business as a whole, not just air spring technology. Our engineering department is your engineering department and if we don't make what you need, we can engineer it. Our customer service line is so dependable and knowledgeable that our competitors often use us to cross reference parts. And no one offers more training to aftermarket staffs than Firestone. Because we strongly believe it takes world-class people to make world-class products.

General Product Information

Although air springs are produced in single, double and triple convoluted and reversible sleeve styles, only those manufactured by Firestone Industrial Products Company bear the trademark “Airide™.”

Airide springs were pioneered and perfected by Firestone, and only Firestone offers a complete line of Airide springs, with replacement springs available for virtually every vehicular air suspension system.

Today, Airide springs are used by practically all manufacturers who offer air suspension on their vehicles. While it may appear simple, an air spring is actually a highly sophisticated and complex product. Even slight changes in design, methods of construction, or materials used can make vast and significant differences in performance.

It makes good sense to specify Airide springs by Firestone. That trade name on an air spring guarantees you the benefit of the very latest technical developments and improvements. It is your assurance of a product not only engineered and perfected to perform, but which also has a long history of superior performance in actual use.

Warranty Information

Industry Leading 5 Year Limited Warranty

Firestone air springs are designed to provide years or thousands of miles of trouble free service. The durability of Firestone air springs is such that they will often outlast other maintenance items on your suspension, such as bushings, shocks, leveling valves or regulators. Airide™ springs by Firestone are warranted to be free of material and/or workmanship defects for various periods of time, depending upon the application.
